Automated CURRENCY GENERATION

A robust complex system to automatically generate a perpetual stream of currency based on established trading systems and solid partnerships.

ATYPICAL
Investment
Opportunity

Atypical character of this business plan

Instead of an investment in a startup business or an expansion of a successful business in operation, this Business Plan covers an investment strategy that requires need money to lockstart its operation.

Based on years of experience

This scheme has been in place for multiple years in a commercial environment where it has been fine-tuned in real, live market conditions.

The current operations are based completely on customer capital, restricted by intermediaries who receive a residual income on a monthly basis. The majority of the generated revenue is therefore allocated to the intermediaries.

This Business Plan will show actual results in trading and reside generation and will explain how a stripped down version can be an automated currency generation machine!

Keep Calm,
remember
**THE HOUSE
ALWAYS
WINS**

EXPERIENCE

Trading software 10 years in the making.
4 Year of live trading on hundreds of accounts.
Updated for new market conditions.
4 years of established partnerships.
